The Barnard Objects: Then and Now Tim B. Hunter,Gerald O. Dobek,James E. McGaha,2023-07-19 The Barnard Objects have fascinated professional and amateur astronomers for over one hundred years. Many of those objects first imaged by E.E. Barnard on black-and-white photographic plates are now being captured daily in thousands of color astrophotographs. This book tells of Barnard's story; describing his life and work as well as how the fields of astronomy and astrophotography have transformed ever since. The chapters in this book are equal parts history and science. It will provide readers with an introduction to nebula science and the incredible discoveries made in this field over the decades; including an overview of popular astronomical catalogues and a detailed look at how astronomical imaging has advanced since Barnard's time, from early plates to digital imaging and chips. In addition, the book features a comprehensive guide to viewing and imaging these objects yourself. A glossary of astronomical and photographic terms is provided, along with

detailed references. And, an updated table displaying the locations of these Barnard Objects; including the missing twenty-five objects from E.E. Barnard's original catalogue. Richly researched and illustrated, this fascinating reference will attract astronomers of all skill levels interested in astrophotography and how it has changed over the past hundred years.

The Catalogue of Shipwrecked Books Edward Wilson-Lee,2020-03-10 This impeccably researched and "adventure-packed" (The Washington Post) account of the obsessive quest by Christopher Columbus's son to create the greatest library in the world is "the stuff of Hollywood blockbusters" (NPR) and offers a vivid picture of Europe on the verge of becoming modern. At the peak of the Age of Exploration, Hernando Colón sailed with his father Christopher Columbus on his final voyage to the New World, a journey that ended in disaster, bloody mutiny, and shipwreck. After Columbus's death in 1506, eighteen-year-old Hernando sought to continue—and surpass—his father's campaign to explore the boundaries of the known world by building a library that would collect everything ever printed: a vast holding organized by summaries and catalogues; really, the first ever database for the exploding diversity of written matter as the printing press proliferated across Europe. Hernando traveled extensively and obsessively amassed his collection based on the groundbreaking conviction that a library of universal knowledge should include "all books, in all languages and on all subjects," even material often dismissed: ballads, erotica, news pamphlets, almanacs, popular images, romances, fables. The loss of part of his collection to another maritime disaster in 1522, set off the final scramble to complete this sublime project, a race against time to realize a vision of near-impossible perfection. "Magnificent…a thrill on almost every page" (The New York Times Book Review), The Catalogue of Shipwrecked Books is a window into sixteenth-century Europe's information revolution, and a reflection of the passion and intrigues that lie beneath our own insatiable desires to bring order to the world today.

Transfiction Klaus Kaindl,Karlheinz Spitzl,2014-01-28 This volume on Transfiction (understood as an aestheticized imagination of translatorial action) recognizes the power of fiction as a vital and pulsating academic resource, and in doing so helps expand the breadth and depth of TS. The book covers a selection of peer-reviewed papers from the 1st International Conference on Fictional Translators and Interpreters in Literature and Film (held at the University of Vienna, Austria in 2011) and links literary and cinematic works of translation fiction to state-of-the-art translation theory and practice. It presents not just a mixed bag of cutting-edge views and perspectives, but great care has been taken to turn it into a well-rounded transficcionario with a fluid dialogue among its 22 chapters. Its investigation of translatorial action in the mirror of fiction (i.e. beyond the cognitive barrier of 'fact') and its multiple transdisciplinary trajectories make for thought-provoking readings in TS, comparative literature, as well as foreign language and literature courses.
